Final-year Software Engineering student with full-stack, AI integration, and mobile development experience across four hackathons. JPA scholar seeking a 20-week internship to apply these skills in a production environment.

EDUCATION

Universiti Kebangsaan Malaysia (UKM) <i>Bachelor's Degree, Software Engineering / Information Systems — Expected Nov 2027 CGPA: 3.77 JPA Scholar</i> Year 4, Semester 1; degree requires a 20-week industrial internship placement.	Bangi, Selangor
Kolej Matrikulasi Kedah <i>Foundation/Matriculation Programme — CGPA: 4.00</i>	Kedah

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Dart, Kotlin, PHP, HTML, CSS
Frameworks/Tools: React, FastAPI, Flutter, Node.js, Socket.IO, Supabase (PostgreSQL), MySQL, Streamlit, Scikit-learn, Google Apps Script, Git/GitHub
IDEs: VS Code, Visual Studio, Android Studio
Concepts: REST APIs, LLM/AI Integration (Gemini API), Database Design, Agile/Team Collaboration, Software Testing

FINAL YEAR PROJECT

StationaryPlus — Stationery Shop Management System
PHP, MySQL, HTML/CSS/JS, Python (forecasting), Google Gemini API

- Building a full-stack stationery e-commerce/POS platform with role-based dashboards (admin, staff, customer), AI-powered recommendations and restocking (Gemini API), and sales forecasting engine.

PROJECTS & HACKATHONS

EventBrainAI — UM Hackathon 2026
React, FastAPI, Google Gemini 2.5 Flash API, Supabase, Socket.IO

- Built a multi-agent AI event-planning assistant that converts natural-language requests into vendor strategies, risk assessments, and execution plans, delivering full logistics output in under 30 seconds.
- Owned the Supabase (PostgreSQL) database design — schema for vendors, sessions, and holiday/risk data — and contributed to the React frontend; team of 4.

GXBuddy — UTM Hackathon 2026
Flutter, FastAPI, SQLAlchemy, Supabase, WebSockets, JWT Auth

- Developed a fintech companion app integrating with GXBank for AI-powered spending coaching, automated salary splitting, and social budgeting; built backend database logic, API routes, and testing.

Marketing Campaign Planner — Google Workspace Hackathon 2024
Google Apps Script, Google Sheets API, Google Calendar API

- Built the frontend for a campaign planning tool integrating Google Sheets and Calendar, helping marketing teams plan and track campaigns end-to-end.

Smart Wallet Guardian — VHack 2026
Streamlit, FastAPI, Scikit-learn, Python

- Built an AI-powered fraud detection prototype that scores digital wallet transactions in real time and outputs Approve/Flag/Block decisions with explanations.
- Contributed to the Streamlit frontend and supported backend API integration with the machine learning model.

WORK EXPERIENCE

Part-Time Crew Member — Mars Cafe / Giggles & Gossip Handled fast-paced customer service, order accuracy, and cash handling across two F&B stints while balancing academic commitments.	2021 & 2024
Part-Time Retail Associate — SignatureArt Assisted customers, managed stock, and supported daily store operations, building strong communication and reliability under pressure.	Aug 2025 – Oct 2025

CO-CURRICULAR EXPERIENCE

Vice-President, SIG Programming Club Led club initiatives and technical programming activities for a student-run programming special interest group.	Apr 2024 – Apr 2025
Head of Technical Committee, Maveeran Tournament Managed technical operations and logistics for a university-level tournament.	Oct 2024 – Jan 2025
Committee Leadership — Multimedia & Events Head of Multimedia Committee (SKMI, KSK); Program Director, inter-collegiate E-Sports (FIFA) — led content production and event coordination.	Apr 2024 – Jan 2025

LANGUAGES

English, Malay, Tamil — Fluent (spoken and written)
